Dear Parent/Guardian,

**Subject: Gifting a Study Table to your child.**

Gifting a study table to your school-going children especially from Class 6 upwards, can have a significant, life-long, impact on their academic performance and overall mental development.

A study table at home is like a launch pad for your ward(s) from where they can reach the heights of success in their life without having any psychological dependence on private tuitions or coaching centres.

Some of the major benefits of having a study table for your ward(s) at home are:

**1. Promotes Self-organization, Self-dependence and Time Management:**

A study table at home provides a dedicated, study-space for your ward(s) to organize their study materials, conduct daily self-study with a home time-table for developing essential study skills and life-long self-dependence in them.

**2. Enhancement of Focus and Concentration:**

A quieter, clutter-free, personal study area will enable your ward(s) to focus better, reduce distractions and improve their study skills.

**3. Solid Support in Academic Performance:**

A well-designed study table can help your ward(s) to stay organized and learn time management skills leading to improved academic performance and better grades in school and in their future life as well.

**4. Fostering Responsibility and Independence:**

Having a personal study space shall encourage your ward(s) to take ownership of their learning, developing a life-long sense of responsibility and independence in them.

**5. Developing Healthy & Daily Study Habits:**

A student's study table at home helps to establish a regular study at home routine, promoting good study habits and a growth mindset at the school level itself.

**6. Encouraging Reading and Learning:**

A dedicated, at-home study space can spark a love for reading and learning, fostering a lifelong passion for knowledge in the young minds.

**7. Preparing for Future Success:**

Developing healthy study habits and organizational skills early on at home can prepare young students for all their future academic and professional successes in life.

To sum up, gifting a study-at-home table to your ward(s) demonstrates an important parental commitment to your ward's education and future well-being, providing a tangible resource to support him/her in their academic journey. It is an investment in the future of your ward for promoting a deep love for learning in them and for helping them develop essential skills for greater and brighter success in their life.

Yours truly,

Mrs. D. Arora  
(Principal)
